

CONSERVATION PRACTICE SPOTLIGHT

RESTORATION OF SKID TRAILS, LOGGING ROADS & STREAM CROSSINGS

The Bollinger SWCD currently has funding to repair eroding skid trails, log landings & stream crossings that exist due to a prior timber harvest. Cost-share can consist of several components necessary for repair of the eroded areas by grade and shaping and the installation of water bars to divert water from following the skid trail. Cost is based on the size and length of the each trail. If you are interested in this practice please call the office at 573-238-2671 ext. 3.
